This list is provided for prospective applicants to assist them in identifying the prerequisite course equivalent at local community colleges. It is not meant to be a comprehensive list of all courses in the Puget Sound region. Please note that some courses may not be listed; if needed, please contact us for more clarification.

Natural Sciences

- **Survey of Physiology**
  Human physiology (for non-majors).

  - **BIOL&241 Human A & P 1**
    Elementary human anatomy and physiology described and illustrated in lecture and lab. Designed to establish a basis for studying clinically related subjects in the paramedical fields. Prereq: BIOL& 160 or CHEM& 121 with a 2.0 or better and ENGL& 101 eligibility. Transfer class.
  And
  - **BIOL&242 Human A & P 2**
    Continuation of BIOL& 241. Prereq: BIOL& 241 with a 2.0 or better, ENGL& 101 eligibility. Transfer class.

- **General Anatomy**
  Survey of human anatomy with correlated lectures and lab. Includes: human skeletal system, muscles, joints, neuroanatomy, circulatory system, digestive system, urinary system, and reproductive system.

  *Please note* that many community colleges in Washington State offer a two course series called Anatomy & Physiology. If you take this, be sure to take both courses in the series.

  - **BIOL&241 Human A & P 1**
    Elementary human anatomy and physiology described and illustrated in lecture and lab. Designed to establish a basis for studying clinically related subjects in the paramedical fields. Prereq: BIOL& 160 or CHEM& 121 with a 2.0 or better and ENGL& 101 eligibility. Transfer class.
  And
  - **BIOL&242 Human A & P 2**
    Continuation of BIOL& 241. Prereq: BIOL& 241 with a 2.0 or better, ENGL& 101 eligibility. Transfer class.

- **Principles of Chemistry**
  Atoms and molecules, their interactions with energy, and their reactions; emphasizes impact of chemistry on everyday life.

  - **CHEM&121 Intro to Chemistry**
    General chemistry for non-science majors. Completion of CHEM& 121 and CHEM& 131 fulfills chemistry requirement for many health science majors (nursing). This course covers the fundamentals of chemistry which includes: structure of atom/molecules, thermodynamics, stoichiometry, equilibrium and
